

# KOHERENCE BUSINESS LEADERSHIP

STARTUP TEAMS

CORPORATE TEAMS

## DESCRIPTION

This training utilizes Koherence techniques and FLIGBY to help current and emerging business leaders cultivate Flow-based teams, powerfully lead dispersed teams, promote learning and innovation, and maintain equanimity through disruptive times. FLIGBY is an award-winning online Leadership Development Simulation that shows decision-makers how to foster Flow and use its psychic energy to enhance the happiness of their employees, customers, stakeholders, and themselves. Koherence Business Leadership is a cutting-edge leadership program specifically designed to provide the support, structure, and content required to lead effectively through coherent leadership skills in a VUCA (volatile, uncertain, complex, and ambiguous) world. The capacity to stay connected, focused, and forward-thinking under pressure can be built.

## TRAINING ENHANCEMENTS

In a world that's emerging from a global crisis, few things are more important than cultivating Koherence & Flow.

Research on Koherence and Flow has consistently shown that developing embodied self-awareness builds resilience, adaptability, and the ability to handle strong emotions and modulate fear.

Through game-based simulation, group support, and expert facilitation, participants will receive:

- Development in Koherence, a state of Flow with others that leads to high performance
- Greater ability to engage, empower, and inspire team members

This training is for you if you want to...

- Be able to make decisions amidst ambiguity, rapid change, and an overwhelming amount of information
- Keep your team engaged, focused, and productive
- Diffuse stress with ways you know are healthy
- Be better equipped to powerfully lead others to transform 'business-as-usual' in a post-pandemic recovery
- Give and receive support from like-minded leaders who are committed to character and leadership development
- Cultivate a culture founded on time-tested principles, which unifies people and multiplies productivity, skill acquisition, creative problem solving, and innovation
